We would like to announce an important addition to the hunter education conference agenda. The Department of Natural Resources Information Technology (IT) Customer Service Team will be at the conference to get your ideas for our new information system that we are building and will come out in 2015. This system will include the instructor interface, student interface, along with other programs.

We would like to meet with the conference attendees and get all your ideas and wants for the next system. The sky's the limit! If you could have your dream machine, i.e. computer software, to make your safety course management easier, what would it look like and what do you want it to do for you?
